PROJECTS

DevMarket | https://www.devmarket.pro | Dec 2024 - May 2025
- Implemented user-friendly onboarding and profile matching for all users, with a **65-70%** onboarding completion rate for **240+** active users.
- Integrated Stripe for payment processing, converting **2-3%** of free users into paid ones.
- Leveraged React Query to handle interactions with user profiles smoothly, resulting in **20+** user testimonials.

Interactive Blog Platform | https://www.danielfullstack.com/blog | Sep 2024 - Dec 2024
- Architected a custom user comments system for my blog, implementing robust CRUD functionality and designing an intuitive user interface, resulting in a **20%** increase in user engagement.
- Deployed my site to AWS CloudFront, reducing hosting costs by **20-30%** compared to Vercel.
- Engineered a CI/CD pipeline using GitHub Actions for automated deployments and micro services.
- Implemented dynamic metadata in NextJS to enhance SEO, optimising content for search engines and increasing site traffic by **15%.**

DevOps Full-Stack Application | Proprietary Work | Jun 2025 - Aug 2025
- Engineered Terraform-based IaC workflows within CI to provision Azure and Google Cloud Platform infrastructure and manage IAM roles, automating roughly **90%** of cloud resource creation and configuration.
- Built a secure GitLab CI/CD pipeline using OpenID Connect–based federated credentials to deploy a Cloud Run Next.js frontend and Azure Function App backend, cutting manual deployment effort by **70%** and fully eliminating hard-coded pipeline secrets.

WORK EXPERIENCE

Full-Stack Software Engineer Intern | Synergix Ltd | Feb 2025 - Jul 2025
- Integrated Finexer Open Banking APIs using test-driven development to enable real-time financial data fetching and verification, alongside code reviews with my supervisor to ensure the business logic is robust.
- Implemented advanced form logic for financial data entry, reducing user input errors and form abandonment rates by **33%.**
- Architected a complex Prisma schema with **25+** relational database models that passed QA, serving as the backbone for the application backend and third-party fintech integrations.

EDUCATION

University of Southampton | BSc Computer Science | Oct 2023 - Jun 2026
Expected Grade: First Class Honours

SKILLS

Full Stack: Nextjs | TypeScript | Java | JEE | .NET | C | C# | Python | JavaScript
Frontend: React | Vue.js | Tailwind | HTML | CSS | UI | UX
Backend: Node | Express | MySQL | Cypress | SQL | NoSQL | PostgreSQL | Prisma | REST API
Cloud: AWS | Azure | Serverless | Security | Docker
Extra: Algorithms | Data Structures | OOP | Agile | Git | Linux | UNIX | Mobile | Machine Learning
